

# TRAINING PROGRAMME

## 'Lawful Interception & Data Retention'

Date: 30 June 2010

Venue: Holiday Inn – Nicosia

Language: English

Lawful interception plays a crucial role in helping law enforcement agencies to combat criminal activity. Lawful interception of public telecommunications systems in each country is based on national legislation in that country.

The purpose of standardization of lawful interception in European Telecommunications Standards Institute (ETSI) is to facilitate the economic realization of lawful interception that complies with the national and international conventions and legislation. The Technical Committee on Lawful Interception (TC LI) is the

leading body for lawful interception standardization within ETSI. Lawful Interception standards have also been developed by ETSI technical bodies like AT, TISPAN (SPAN and TIPHON) TETRA and by 3GPP.

The role of TC-LI in these partnerships is in the development and publication of handover interfaces, and of rules for the carriage of technology specific interception or retained data delivery across these interfaces.

**The seminar is sponsored by CYS and Cyta**

Venue: Holiday Inn Hotel Nicosia  
Wednesday 30<sup>th</sup> June 2010  
Duration: 9:00am - 14:00pm

## Programme

## Holiday Inn Hotel, Nicosia

08:45	<b>Registration</b>
09:15	Welcome Address by : <ul style="list-style-type: none"><li>Chairman CYS: <b>Mr P. Markou</b></li><li>CEO of Cyta: <b>Mr Ph. Savvides</b></li></ul> Opening of the seminar by: <ul style="list-style-type: none"><li>Permanent Secretary of the Ministry of Justice &amp; Public Order <b>Dr Petros Kareklas</b></li></ul>
09:35	<b>Peter Van der Arend – ETSI/TC LI and details of ETSI activities on Lawful Interception standardization and Retained Data Handling</b>
10:35	<b>Discussion</b>
10:50	Coffee Break
11:05	<b>Pim van Stam - Intercepting data in Internet Service Provider (ISP's) and Telco networks</b> <ul style="list-style-type: none"><li>What IP services can or need to be intercepted</li><li>How do you intercept in IP networks</li><li>The role of the NBIP (National service organization of Internet Providers)</li><li>Future developments, like Voice over IP (VoIP) and data retention</li></ul>
12:05	<b>Discussion</b>
12:20	Coffee Break
12:35	<b>Koen Jaspers - Dutch LI and Data Retention (DR) situation</b> <ul style="list-style-type: none"><li>History</li><li>Legal frame work</li><li>Standardization process</li><li>Telephony and IP</li><li>Architectural approach for LI and DR</li><li>Projects</li><li>Challenges</li></ul>
13:35	Discussion / End of Seminar

### GUEST SPEAKERS

**Peter van der Arend** is the Chairman of ETSI/TC LI responsible for the standardization of the interface between Communication Service Providers and Law Enforcement Agencies for the handover of Law Intercepted data and Retained data.

**Pim van Stam:** is working for ten years for ISP's. Since 2002 for the NBIP (National Service Organization of Internet Providers) which is a foundation of Internet Providers. The NBIP takes care of the lawful interception on behalf of 80 ISP's in the Netherlands. An investigation for delivering services on data retention is on going. Pim is leading the NBIP office from 2005.

**Koen Jaspers** is editor of Li and DR requirements documents. On a national basis he coordinated the development of national LI specifications and later the adoption of ETSI LI specifications to Dutch requirements.
